TALK SHOW

**THE ROLE OF SCIENTIFIC SOCIETIES IN THE DRAFTING PROCESS OF GUIDELINES
AND DIAGNOSTIC-THERAPEUTIC PATHWAYS IN A CHANGING HEALTHCARE SYSTEM**

PA Guidelines don't just represent an essential tool for the creation of modern and effective diagnostic-therapeutic pathways, but also a tool to protect professionals from the medical-legal point of view.

In oncology, the requirement for a multi-disciplinary treatment would direct toward the creation of common and shared guidelines for the oncology-oriented scientific societies and this will be the topic of the talk show hosted by a healthcare journalist.
